

## **VIRASEL VALVE SOLUTIONS**

### **QMS Policy Statement**

Virasel Valves are a highly professional, supply, installation, refurbishment, Calibration and recertification provider of valves for a wide range of different industries such as oil and gas and power. The scope of our QMS system covers all of our activities.

Our company is committed to developing, maintaining and continually improving effective and efficient processes and systems, designed to meet and exceed the requirements of ISO9001:2015. Virasel is also committed to the continual improvement of its Quality Management System (QMS) and the associated health and safety of its employees, its customers, its suppliers, and the public. Our objectives are to provide high quality products and services.

Virasel will ensure this policy is effective by:

1. Compliance will all relevant laws and regulations.
2. Minimise the health & safety risks, impacts created by work activities, and services, by organising ourselves in a way that secures involvement and participation at all levels.
3. Providing the necessary information, training and supervision to ensure a trained and competent workforce, using best industry practices.
4. Setting and reviewing effective measurable QMS objectives and targets as they are required for continual improvement.
5. The regular audit and review of Virasel QMS management system performance to ensure its continued suitability and:
6. Encouraging feedback from customers, external provided services and employees.

All staff are responsible for adhering to the company's QMS requirements, which are communicated to all members of staff through the management system documentation relevant to each employee's duties.

Responsibility for establishing and implementing Virasel QMS policy lies with the Directors, who are responsible for developing, documenting, implementing and maintaining the management system based on ISO9001:2015.

Signed 

Lee Donnelly, Managing Director
